CAREER OBJECTIVE

Entry-level Software Engineer with strong skills in Python, SQL, Django, and REST API development. Experienced in building backend applications, database-driven systems, and scalable web solutions through internships and academic projects. Strong foundation in Data Structures, Algorithms, DBMS, and Software Engineering principles, with a passion for problem-solving and backend development.

INTERNSHIPS EXPERIENCE

Software Developer Intern, SARVA SUVIDHAEN PRIVATE LIMITED

- Designed and developed RESTful APIs for an e-commerce application using Python with secure authentication, validation, and optimized database interactions using MySQL.
- Tested, validated, and optimized APIs using Postman and HTTP methods (GET, POST, PUT, DELETE), improving backend workflow efficiency and application reliability.
- Collaborated with frontend developers and cross-functional teams to integrate APIs and deliver scalable end-to-end application features.

Software Developer Intern, DATAPRO COMPUTERS PVT LTD, Vizag

- Developed backend modules for a house rental platform, handling data storage, retrieval, and processing using MySQL.
- Designed admin functionalities to manage property listings, including data validation and structured database operations.
- Worked with APIs to enable seamless interaction between frontend and backend systems.
- Performed API testing and debugging using Postman, ensuring reliable data exchange and application stability.

EDUCATION

Avanthi's Research Technological Academy | vizag

Oct 2021 – Apr 2025

Bachelor of Technology (B.Tech)

7.0 / 10

Computer Science

SKILLS

Programming Languages: Python, SQL, JavaScript (Basic)

Frameworks & Technologies: Django, FastAPI, REST APIs

Core Computer Science: Data Structures, Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

Databases: MySQL, SQL Queries, Relational Database Concepts

Libraries: Pandas, NumPy, Matplotlib, Scikit-learn

Tools & Platforms: Git, GitHub, Postman, MS Excel, Netlify, Railway, Render

Concepts: Backend Development, API Development, Database Management, Problem Solving, Software Engineering Principles

Soft Skills: Communication, Team Collaboration, Analytical Thinking, Adaptability, Quick Learning

Coding Profile: LeetCode (500+ Problems Solved)

PROJECTS

AI-Powered Smart Stock Management System | Django, MySQL, Python, Pandas, Scikit-arn, Matplotlib

- Developed an AI-powered stock management system using Django, Python, and MySQL to manage inventory, sales, and purchase operations for retail shops. Implemented real-time stock tracking with automated inventory updates and data validation to ensure accurate stock management.
- Utilized Pandas, Matplotlib, and Scikit-learn for sales analysis, data visualization, and demand forecasting based on historical sales data.
- Built RESTful APIs and scalable backend modules, and deployed the application using Netlify and Railway/Render for seamless accessibility and performance. reliability.

Banking Management System | Python, Django, MySQL, REST APIs

- Developed a banking management application using Django, Python, and MySQL with role-based authentication for Admin and User modules.
- Implemented core banking features including account creation, deposit, withdrawal, balance enquiry, and transaction management with real-time database updates.
- Designed RESTful APIs, backend business logic, and administrative functionalities while ensuring data validation, security, and efficient database management.
