CAREER OBJECTIVE

Entry-level Software Engineer with internship experience in Python, Django, SQL, backend development, and REST API testing. Strong foundation in Java, Data Structures and Algorithms, Object-Oriented Programming, and DBMS. Experienced in developing backend modules, working with relational databases, integrating APIs, and debugging applications. Seeking an opportunity at Cognizant to contribute to software development projects while learning and working with modern technologies.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL
Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Problem Solving
Backend & APIs: Django, Django REST Framework, FastAPI, REST APIs, API Integration,HTTP Methods
Databases: MySQL, PostgreSQL
Data & Machine Learning: Pandas, NumPy, Matplotlib, Scikit-learn, Data Preprocessing
Tools: Git, GitHub, Postman, VS Code, Linux CLI

INTERNSHIP EXPERIENCE

Software Developer Intern
SARVA SUVIDHAEN PRIVATE LIMITED (Remote)

- Developed backend application features using Python, Django, and MySQL, including REST API endpoints with authentication and input validation.
- Tested and debugged API endpoints using Postman; worked with SQL queries and database operations to support reliable application functionality.
- Collaborated on API integration and backend issue resolution to support application development.

Software Developer Intern
DATAPRO COMPUTERS PVT LTD, Visakhapatnam

- Developed backend modules for a House Rental Management System using Python and MySQL, implementing CRUD operations and database management.
- Built and integrated REST API functionality to support communication between frontend components and backend services.
- Performed API testing, debugging, and SQL query work using Postman to improve application reliability.

PROJECTS

AI-Powered Smart Stock Management System *Python, Django, MySQL*

- Developed an inventory management application to manage product information, monitor stock levels, and organize inventory operations.
- Used Pandas and NumPy to process inventory data and Scikit-learn to explore demand forecasting approaches.
- Created data visualizations using Matplotlib and implemented backend functionality for inventory-related operations.

AI-Powered Portfolio Assistant *Python, Django, FastAPI, React, Gemini API*

- Developing a conversational portfolio assistant that helps recruiters explore projects, technical skills, internships, certifications, and experience.
- Integrating the Gemini API with Python backend services to generate context-aware responses using portfolio information.
- Building REST APIs and a React-based interface to connect the frontend with backend services.

EDUCATION

Avanthi's Research & Technological Academy, Visakhapatnam **Oct 2021 – Apr 2025**
Bachelor of Technology in Computer Science and Engineering CGPA: 7.0/10

CERTIFICATIONS

- Python Full Stack Development – DataPro
- Data Science – IBM
- Privacy and Security in Online Social Media – NPTEL
